

UniverSIM[®] Analyser

The universal POS tool for (U)SIM management, service, and diagnostics

The new, enhanced POS (U)SIM support tool

UniverSIM[®] Analyser is a professional (U)SIM card management tool that consists of PC software in combination with a smart card reader. It is designed for the point of sale and as such is easy to operate and self-explanatory.

UniverSIM[®] Analyser integrates the most important (U)SIM support functions in one tool:

- (U)SIM edit
- (U)SIM swap
- (U)SIM diagnostic
- (U)SIM maintenance

You can easily manage (U)SIM cards via a PC with the UniverSIM[®] Analyser. The startup screen provides the global (U)SIM information at a glance. The tool allows you to edit, create, and sort as well as back up and restore (U)SIM phonebook data.

Using the UniverSIM[®] Analyser Swap Wizard you can easily copy the (U)SIM user data (e.g. phonebook, SMS, own phone number) to any other (U)SIM.

Managing the PIN data is uncomplicated and secure. You can activate, deactivate, and unblock the PIN values. Even redefining the PIN values for a specific (U)SIM card is supported.

Giesecke & Devrient

UniverSIM® Analyser also offers a range of SMS-related services such as editing of incoming and outgoing SMS folders on a (U)SIM and reading and manipulating the SMSC number.

UniverSIM® Analyser is the versatile (U)SIM management tool combining intuitive usage with functionality tailored to the point of sale.

UniverSIM® Analyser—at a glance

UniverSIM® Analyser benefits

- Full support of all SIM Phase1, 2, and 2+, (U)SIM
